## PART A

### FUNDAMENTALS – Chapter 1-6 / 13

- 1 An Imaginary Voyage with an Electronic Chart / 15**
  - 1.1 Using ECDIS / 15
  - 1.2 Coming a long way / 16
  - 1.3 Challenged by complexity / 16
  - 1.4 Record of the voyage / 16
  - 1.5 Summary / 23
  
- 2 Components and Functions of an Onboard Electronic Chart Display System / 24**
  - 2.1 Hardware and software requirements / 25
  - 2.2 Electronic chart data / 28
  - 2.3 Display software / 30
  
- 3 ECDIS, RCDS and ECS / 32**
  - 3.1 What is ECDIS? / 32
  - 3.2 ... and what is ECS? / 38
  - 3.3 What is RCDS? / 39
  - 3.4 ECDIS in RCDS mode / 39
  - 3.5 ENC mode and RCDS mode compared / 40
  - 3.6 Paper charts compared with RCDS and ECDIS / 43
  
- 4 Data: Types, Structures and Standards / 44**
  - 4.1 Information and data: spatial referencing / 45
    - 4.1.1 Methods of representation / 45
    - 4.1.2 Raster chart / 47
    - 4.1.3 Vector chart / 49
  - 4.2 Data structures / 51
    - 4.2.1 Concepts of geographic feature representation / 52
    - 4.2.2 Object-based Electronic Chart Data Base / 55
    - 4.2.3 Spatial referencing in vector charts / 55
  - 4.3 Overview of Relevant ENC Standards / 62
    - 4.3.1 S-57: the basis of the world-wide ENC exchange / 62
    - 4.3.2 Data format vs. data structure – a clarification / 64
    - 4.3.3 Data encryption / 65
    - 4.3.4 Another S-57 implementation: Port ECDIS / 66
    - 4.3.5 IHO S-100: the future IHO data standard / 67
    - 4.4 ENC production / 68
  
- 5 Hydrographic Matters / 70**
  - 5.1 Some geodetic basics / 70
    - 5.1.1 Horizontal datum / 70
    - 5.1.2 Chart datum, the vertical reference level / 75

- 5.2 Hydrographic basics / 77
  - 5.2.1 Hydrographic content of ENCs / 77
  - 5.2.2 Quality of the hydrographic data / 78
  - 5.2.3 Hydrographic surveying / 79
  - 5.2.4 The need for frequent updating / 82
  - 5.2.5 Official and unofficial data / 82
  
- 6 ENC Visualisation – from Data to Chart Display / 84**
  - 6.1 Visualisation of vector charts – general principles / 84
  - 6.2 Displaying ENCs by means of the Presentation Library / 84
  - 6.3 The elements of the Presentation Library – an overview / 85
    - 6.3.1 The colour tables / 85
    - 6.3.2 The colour coding scheme / 86
    - 6.3.3 Monitor calibration / 86
    - 6.3.4 The library of symbols, area fill styles and line styles / 87
    - 6.3.5 The look-up tables / 91
    - 6.3.6 Symbology instructions / 93
    - 6.3.7 Navigational symbols / 95
    - 6.3.8 Basic concept of the Display Generator / 97
  - 6.4 Ergonomic considerations in display arrangement / 99
  - 6.5 Advancement of chart displays / 99
  - 6.6 Visualisation of raster charts / 100

## PART B

### ECDIS-RELATED FUNCTIONS – Chapter 7-13 / 103

- 7 User Interface and System Configuration / 105**
  - 7.1 User interface / 105
  - 7.2 System configuration and start-up procedure / 108
  
- 8 Chart Handling Functions / 110**
  - 8.1 Chart data: Base cells and updates / 110
    - 8.1.1 The structure / 110
    - 8.1.2 Provision of charts and updates / 111
    - 8.1.3 From ENCS to the SENC / 111
  - 8.2 Charts and Permits / 112
  - 8.3 Availability of charts / 113
  - 8.4 Importing and updating charts / 116
    - 8.4.1 Implementing updates / 116
    - 8.4.2 User relevant internal procedures / 118
  - 8.5 Viewing the status of updates / 119
  - 8.6 Manual updating / 120

**9 Chart Display-related Functions and Tools / 123**

- 9.1 Selection of the sea area / 123
- 9.2 Chart status and quality / 124
- 9.3 Display of data: few, standard or all? / 125
- 9.4 Scale, range and usage / 127
- 9.5 Areas for which special conditions exist / 135
- 9.6 The Pick report: Detailed background information / 136
- 9.7 Depth information and Safety contour / 137
- 9.8 ECDIS symbols: Navigator's selection and identification / 141
- 9.9 Navigator's entries: notes and danger highlights / 143
- 9.10 Day and night display (colour modes) / 144
- 9.11 Mode of presentation / 146
- 9.12 Navigational tools / 148
- 9.13 Alarms and status indications / 150

**10 Route Planning Functions / 152**

- 10.1 Bridge procedures for route planning / 152
- 10.2 Constructing the draft route / 153
- 10.3 Refining the route / 154
- 10.4 Automatic Route check / 157
- 10.4.1 Parameter setting for automatic Route check / 157
- 10.4.2 Route check and route correction / 158
- 10.5 The final route and Way point list / 160
- 10.6 Route management / 162

**11 Route Monitoring Functions / 163**

- 11.1 Bridge procedures for route monitoring / 163
- 11.2 Modes and settings for route monitoring / 165
- 11.3 Automatic position display and its limits / 166
- 11.3.1 Automatic real-time display / 166
- 11.3.2 Quality requirements of position-fixing within ECDIS / 167
- 11.3.3 Accuracy: Systematic and statistical errors / 168
- 11.3.4 Available position-fixing systems / 170
- 11.3.5 Risks and effects of inaccurate position determination / 171
- 11.4 Position monitoring by the Navigator / 171
- 11.4.1 Visual position monitoring in the ECDIS display / 171
- 11.4.2 Automatic alarms and indications / 172
- 11.4.3 Active position monitoring by the OOW / 173
- 11.5 Display of own ship's motion / 177
- 11.5.1 Course and speed sensors / 177
- 11.5.2 Vectors / 178
- 11.6 Ship and environmental data / 179
- 11.7 The 'Look ahead' function and alarms / 180
- 11.7.1 ENC-related alarms / 180
- 11.7.2 Anti-grounding alarms and parameter setting / 181
- 11.7.3 The Anti-grounding alarm messages / 183
- 11.7.4 Unjustified ECDIS alarm? / 183
- 11.8 Sensor and track control and other alarms and indications / 185
- 11.9 Predicting own ship's movement / 186
- 11.10 ECDIS voyage recording / 188
- 11.11 Additional functions for route monitoring / 190

**12 Integration with Other Navigational Systems / 192**

- 12.1 ECDIS Radar Overlay / 192
- 12.1.1 Relevant characteristics of radar data / 192
- 12.1.2 Integration of instruments and data / 194
- 12.1.3 Integration of grounding and collision avoidance / 196
- 12.1.4 Position monitoring / 199
- 12.1.5 Further benefits of the radar overlay / 199
- 12.1.6 Tracked target (ARPA) overlay / 201
- 12.1.7 Drawbacks and problems / 202
- 12.2 AIS Information in ECDIS / 203
- 12.2.1 AIS Fundamentals / 203
- 12.2.2 AIS Symbology and use of AIS / 205
- 12.2.3 VTS information in ECDIS / 208
- 12.3 Automatic track control / 212
- 12.3.1 Route planning / 213
- 12.3.2 Starting track control / 213
- 12.3.3 Following a track through track control / 213
- 12.3.4 Remotely controlled track steering / 215
- 12.3.5 Track monitoring / 215
- 12.3.6 Speed monitoring / 217
- 12.4 ECDIS within an Integrated Navigation System (INS) / 217
- 12.4.1 The INS tasks and structure / 217
- 12.4.2 ECDIS-related tasks and functions of an INS / 218

**13 RCDS Mode of Operation / 221**

- 13.1 RNC: Capabilities and limitations / 221
- 13.1.1 Display related / 221
- 13.1.2 Route planning / 222
- 13.1.3 Route monitoring / 222
- 13.1.4 Integration with other navigational systems / 222
- 13.2 Operational procedures / 222

**PART C****DATA SERVICES AND UPDATES – Chapter 14-15 / 231****14 Official Data Services for ECDIS / 233**

- 14.1 The organisational framework for international ENC distribution / 233
- 14.1.1 Uniform and direct – The principles of the ECDIS service / 233
- 14.1.2 WEND: A charter and an organisational concept / 234
- 14.2 The actual supply of data services / 236
- 14.3 ENC data coverage / 237
- 14.4 RND data / 238
- 14.5 Service modes of ENC distribution / 240
- 14.6 Licensing issues / 241
- 14.6.1 Portfolio options / 242
- 14.6.2 Licence period / 242
- 14.6.3 Pricing options / 242

**15 Chart Updating / 244**

- 15.1 The burden of paper chart / 244
- 15.2 Automatic chart correction – a good reason why ECDIS is worthwhile / 246
- 15.2.1 ECDIS forces wireless communication / 246
- 15.3 A long way to the ships / 247

- 15.3.1 Broadcasting updates / 248
- 15.3.2 Flexible internet based solutions / 249

## PART D

### ECDIS TRAINING – Chapter 16-18 / 251

#### 16 The Need and Objectives of ECDIS Training / 253

- 16.1 The need for ECDIS training / 253
  - 16.1.1 The practical need / 253
  - 16.1.2 Mandatory ECDIS training and certification / 255
  - 16.1.3 General ECDIS training topics / 257
- 16.2 STCW 2012 requirements / 259
  - 16.2.1 Competency – levels and requirements / 259
  - 16.2.2 Specification of minimum standard of competence / 260
- 16.3 Certification / 261
  - 16.3.1 STCW convention / 261
  - 16.3.2 STCW 2010 / 262

#### 17 Realisation and Implementation of ECDIS Training / 263

- 17.1 The IMO model training course Operational Use of ECDIS / 263
- 17.2 Principal ECDIS training subjects / 265
- 17.3 Construction of scenarios and use of simulators / 266
  - 17.3.1 Construction of scenarios / 266
  - 17.3.2 Use of simulators / 266
  - 17.3.3 Example: A Scenario for route planning and route monitoring / 271
- 17.4 Where and how can ECDIS training be achieved? / 278

#### 18 ECDIS Training Software / 282

- 18.1 The TRANSAS ECDIS demo software / 282
- 18.2 Installation / 283
- 18.3 Contents and main functionalities of the software / 283

## PART E

### OTHER ESSENTIAL ECDIS ASPECTS – Chapter 19-24 / 285

#### 19 Back-up and Integrity Monitoring / 287

- 19.1 Back-up arrangements / 287
  - 19.1.1 Functional and operational requirements / 287
  - 19.1.2 Back-up options / 288
  - 19.1.3 Pros and cons / 289
  - 19.1.4 ECDIS as multifunction station within an integrated navigation system (INS) / 290
  - 19.1.5 Deciding on back-up arrangements / 290
- 19.2 Integrity monitoring / 291

#### 20 Safety Issues: Benefits and Risks / 293

- 20.1 Benefits to navigators / 293
- 20.2 Overall benefits to maritime shipping / 296
- 20.3 Safety risks / 297
- 20.4 IMO safety initiatives / 299

#### 21 Regulatory and Legal Implications / 302

- 21.1 Regulatory requirements for ECDIS / 302
- 21.2 Standardisation and regulatory requirements for ECS / 303

- 21.2.1 IEC ECS standard / 303

- 21.2.2 RTCM standard for ECS / 304

- 21.2.3 ISO ECS database standard / 304

- 21.3 Type-approval certification / 304

- 21.3.1 ECDIS test standards by IEC / 305

- 21.3.2 ECS testing / 305

- 21.4 Legal liability / 305

- 21.4.1 Hydrographic offices / 306

- 21.4.2 System manufacturers / 307

- 21.4.3 Maritime safety administration and classification societies / 308

- 21.4.4 Ship owners/mariners / 308

- 21.5 Data security schemes / 309

- 21.6 Official vs. non-official data / 310

- 21.7 Quality assurance / 310

- 21.8 Voyage recording / 311

#### 22 Economic Aspects / 312

- 22.1 Purchase costs / 312

- 22.1.1 Paper charts and nautical publications / 312

- 22.1.2 Electronic chart system / 312

- 2.2 Operational costs / 313

- 22.2.1 Paper nautical charts / 313

- 22.2.2 Electronic chart data / 314

- 22.3 Cost-benefit analysis / 314

- 22.4 Operational efficiency / 315

#### 23 Additional Layers and New Applications / 317

- 23.1 Marine information overlays (MOIs) / 317

- 23.1.1 Sea ice coverage / 318

- 23.1.2 Tides, water levels / 319

- 23.1.3 Current flow / 321

- 23.1.4 Weather/oceanographic / 321

- 23.1.5 Marine protection areas / 321

- 23.2 Additional military layers (AMLs) / 324

- 23.3 Military ECDIS / 325

- 23.4 Inland ECDIS/ECS and inland ENCs / 328

- 23.5 Customised types of ENCs / 330

- 23.5.1 Port ENC / 330

- 23.5.2 Bathymetric ENC / 331

- 23.5.3 Dynamic ENC / 332

- 23.6 Portable pilots units (PPUs) / 333

- 23.7 AIS application-specific messages / 335

#### 24 Future Trends in Chart Related Navigation Technology / 338

- 24.1 Separate equipment- integrated systems / 338

- 24.2 ECDIS as component of e-navigation / 339

- 24.2.1 Objectives of e-navigation / 340

- 24.2.2 From e-navigation user needs to e-navigation systems/services / 341

- 24.3 Marine spatial data infrastructure (MSDI) / 342

- 24.4 Outlook to the future / 345

#### Glossary / 349

#### Appendices / 359

#### List of References / 365

#### Index / 373
